

JOAQUÍN GUERRERO

Full Stack Developer

Rosario, Santa Fe, Argentina

joaquinguerrero256@gmail.com | 3462515284

www.linkedin.com/in/joaquinguerrero256

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience designing and building scalable web applications with a strong focus on performance, reliability, and clean architecture.

Experienced in building modern web applications using JavaScript frameworks and TypeScript, with strong focus on offline-first systems using Service Workers and IndexedDB.

Skilled in designing data synchronization strategies that ensure system continuity in low or no connectivity environments.

Experienced in applying Clean Architecture and design patterns such as Repository and Strategy to build maintainable and scalable solutions.

Focused on solving real-world business problems through efficient system design, data consistency, and resilient application behavior.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Wynges – Líder Gestión, Rosario, Argentina

Oct 2024 – Present

- Designed and developed a web-based business management system for retail environments including supermarkets and hardware stores
- Implemented a Point of Sale (POS) system capable of operating in low or no connectivity scenarios
- Built a Progressive Web App (PWA) enabling full offline functionality
- Designed a data access layer using Repository Pattern with dynamic switching between API and IndexedDB
- Implemented API-first and Local-first strategies to optimize performance and reliability

- Developed a background synchronization system to:
 - Incrementally fetch data from the API
 - Persist data locally for offline operation
 - Automatically sync pending data once connectivity is restored
- Ensured data consistency between local storage and remote API
- Improved system resilience by enabling uninterrupted operation during network failures
- Focused on performance optimization, scalability, and maintainability

Technologies: Vue 3, Quasar, TypeScript, Service Workers, IndexedDB.

Full Stack Developer (Freelance)

E-learning Financial Platform

Feb 2024 – May 2024

- Designed and developed a web platform for selling and managing asynchronous online courses
- Implemented course purchasing and access control system
- Built a virtual classroom with integrated video playback
- Developed an admin panel for instructors to manage course content
- Implemented automated certificate generation upon course completion
- Designed backend services for user management, course tracking, and progress handling

Technologies: React, Node.js, PostgreSQL

PROJECTS

Offline-First Point of Sale (POS) System

- Designed and implemented an offline-first POS system within a web application
- Enabled system operation without internet connectivity using Service Workers and IndexedDB
- Developed incremental background synchronization to keep local and remote data in sync
- Implemented automatic recovery and data synchronization after connectivity restoration
- Designed dynamic data access strategies to switch between online and offline modes
- Ensured data integrity and consistency across distributed states

Technologies: Vue 3, Quasar, TypeScript, IndexedDB, Service Workers

TECHNICAL SKILLS

Frontend: Vue 3, Quasar Framework, React, JavaScript (ES6+), HTML5, CSS3, SCSS, SASS, Material UI, Bootstrap, PWA

Backend: .NET / C#, Node.js, Python

Architecture: Clean Architecture, Repository Pattern, Strategy Pattern

Databases: PostgreSQL, MySQL, SQLite, IndexedDB

Tools: Git, Service Workers, Postman, Electron, Figma, Cursor IDE, Visual Studio, Visual Studio Code

EDUCATION

Technical Degree in Programming

Universidad Tecnológica Nacional (UTN), Rosario

Jul 2023 – Jul 2025

High School Diploma (Economics)

Colegio San José

2014 - 2018

ADDITIONAL TRAINING

Web Development – Coderhouse (2023)

Python – Coderhouse (2023)

JavaScript – Coderhouse (2023)

LANGUAGES

Spanish: Native

English: Basic (currently improving)
